PROJECTS

Real-Time Chat Application <i>React.js · Node.js · Express.js · Socket.io · TailwindCSS</i> - Engineered a real-time messaging app supporting concurrent users across multiple chat rooms using Socket.io, with sub-200ms message latency. - Implemented secure, JWT-based user authentication and session handling to prevent unauthorized room access. - Built a fully responsive UI with Tailwind CSS, reducing layout-related bugs across mobile and desktop breakpoints.	Github Live Demo
E-Commerce Web Application <i>React.js · React Router · Bootstrap · TailwindCSS · JavaScript (ES6)</i> - Developed a responsive e-commerce platform with 15+ reusable React components, cutting duplicate code and speeding up feature delivery. - Integrated client-side routing via React Router for zero-reload navigation across Catalog, Product Detail, and Checkout pages. - Optimized asset loading and rendering, improving page load time by 15% (Lighthouse score: 82/100).
